Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

The amendment received 25 March 2005 has been made of record. Claims 1-9 are pending.

The rejection under 35 USC 112 contained in the previous office action is withdrawn in view of applicants' amendment.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the formula for the coupling agent allows for a, m and n to be 0. Under this circumstance applicants' coupling agent would be a metal atom. Applicants' do not intend their coupling agent to be a metal atom.

Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chandler et al in view of Monte et al.

Chandler et al disclose PTC polymeric compositions comprising polymers such as claimed instantly admixed with metal and titanate coupling agent (abstract and column 7, lines 13-25). The coupling agent is taught as present in amounts at least

Art Unit: 1714

overlapping those claimed instantly. The reference fails to explicitly recite coupling agents conforming to applicants' formula.

The reference to Monte et al discloses titanate coupling agents meeting the requirements of applicants' formula. These coupling agents are taught as suitable for coupling carbon black and metals to a variety of polymeric matrices.

It would have been obvious to one of ordinary skill in the art to utilize the titanate coupling agents taught by the secondary reference in the PTC compositions of the primary reference since the primary reference specifies titanate coupling agents.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F from 10:00 to 6:00.
